

GOVERNMENT OF KERALA

A large graphic featuring a 3D bar chart with four bars of increasing height, colored orange, red, teal, and blue. A thick red line graph trends upwards across the bars. The background is a composite image of a rural landscape with palm trees and a field. Several circular icons are overlaid on the chart: a yellow sack with a plant, a green watering can, a gear mechanism, and a seedling in a pot. The title 'A COMPENDIUM OF AGRICULTURAL STATISTICS: KERALA 2023' is written in large, bold, pink letters with a white outline across the middle of the graphic.

P. PRASAD
MINISTER FOR AGRICULTURE
GOVERNMENT OF KERALA

MESSAGE

After the COVID-19 pandemic, the Kerala economy's most resilient area was found to be the agriculture sector, which has experienced positive growth rates and rising output over the past years. Though Agriculture development and Farmers welfare Department of Kerala is implementing various schemes and programmes for the benefit of farmers, the statistical information on the achievements as well as status are not yet consolidated on yearly basis.

'A COMPENDIUM OF AGRICULTURAL STATISTICS : KERALA 2023' is one of the most reliable source of information to assess the Agriculture Sector in Kerala. This publication provides the consolidation of database in various activities in agricultural sector in Kerala for the last 20 years and it also serves as a reference manual for all the crucial statistical information regarding this sector.

I congratulate Sri.George Alexander, Additional Director of Agriculture (Planning) and team for consolidating the data base. I believe this information would be useful to all stakeholders including policy makers, administrators, academicians, extension workers and the farming community in the State for achieving the overall objectives of Agriculture Sector in Kerala.

The Compendium will surely remain a prominent milestone in the agricultural development of Kerala and I extend my best wishes to the whole team who has striven to make this valuable document a reality.

P. PRASAD
MINISTER FOR AGRICULTURE

Dr. B. ASHOK IAS
PRINCIPAL SECRETARY &
AGRICULTURAL PRODUCTION COMMISSIONER

Agriculture Department
Government Secretariat
Thiruvananthapuram-695 001

MESSAGE

The dearth of relevant statistics has always been a limiting factor in determining the charter of Kerala Agriculture. In a datafied world this gap is likely to influence the impact factor of the state expenditure and actions of the extension workforce.

The data dimension and lacunae assume more significance as intelligent data bases start driving highly productive agriculture systems in the world.

Kerala agriculture system is complicated by a large number of small farm holdings, high-density multi-cropping, rain-fed systems and a preference for conservation agriculture. Data systems need to adapt to these variables.

It is in this context that the Department of Agriculture has produced a compilation of the key data for the last twenty years. As a beginning, it has the potential to grow into an eminent periodical issue of the Agriculture Development and Farmers Welfare Department. I congratulate it's architects, Smt. Anju K S IAS, Director of Agriculture, and Shri. George Alexander, Additional Director of Agriculture (Planning) who has been the lead force behind this compendium.

I wish the endeavour all success.

Dr. B ASHOK IAS
Principal Secretary &
Agricultural Production
Commissioner

ANJU K. S. IAS
DIRECTOR OF AGRICULTURE

P R E F A C E

Kerala is blessed with unique agro climatic conditions that enables it to follow good agricultural practices. The agricultural economy has been undergoing structural transformation over a period of years and the reflection of same in quantified form has been consolidated in this publication named "A Compendium of Agricultural Statistics : Kerala 2023". Kerala's agricultural economy, achieve targeted growth rate for agriculture sector by successful implementation of various schemes and the historical agricultural data on various perspectives are very important for successful policy making.

This document can work as a valuable tool with requisite data available in a single document over a period of years. Efforts taken to bring about such a compendium of agricultural data based on various published documents giving insight to the trends in land utilization, growth rate, agricultural area, production, productivity, etc. is sincerely appreciated.

I hope this will become a handy publication for policy makers, planners, researchers, academicians as an easily accessible tool for agriculture related information and for decision making.

Anju K. S. I.A.S.
Director of Agriculture

Thiruvananthapuram

INTRODUCTION

Agriculture is an important sector of Kerala Economy as nearly 4 million of its population relies on it as the principal source of income, both directly and indirectly. Research and Extension system plays a major role in the generation and dissemination of agricultural technology, aiming at enhancing the income of farmers. The extension system adopts a series of methods such as training, demonstration, exposure visit etc., to transfer technologies from lab to land. Majority of these extension efforts mainly focus on location and crop specific technologies, particularly on a solution-to-problem basis. However, there is a need for equipping the policy makers, planners and researchers with sufficient amount of data in all parametric dimensions.

With the rise of smart farming technologies in agriculture leading to greater data creation and utilization by producers and researchers, many questions have risen and still persist regarding data management throughout the agriculture sector.

Agricultural data are crucial to many aspects of production, commerce and research involved in feeding the global community. However, in most agricultural research disciplines, standard best practices for data management and publication do not exist. This document is one of the attempts being made

by the Agriculture Development & Farmers' Welfare Department, Government of Kerala, to compile the available data and present it as a compendium.

This book gives a comprehensive summary of agricultural statistics published by various departments. The data has been taken from the publications "Agriculture Statistics", "Report on Agriculture Census", "GVA by Economic Activity with Base Year 2011-12" and "Cost of Cultivation" of the Department of Economics and Statistics. "Economic Review" published by the State Planning Board has also been used to gather information. The population details are based on the figures of Census 2011. Indian Meteorological Department data has been relied upon for details on rainfall distribution. The Crop Loss Data taken from AIMS portal, Plan Progress Report from 2002 to 2022, organisational structure of the department, and procurement price of paddy are also included in this publication.

The data of Agricultural Census is crucial in the formulation of schemes. Data related to Agricultural Census for the years 2000-01, 2005-06, 2010-11 and 2015-16 have been included.

State level estimates of Gross Cropped Area, Net Cropped Area and Cropping Intensity from 2002-03 to 2020-21, Area Under Land Utilization, Gross Area Irrigated and Net Area Irrigated of the last ten years are included. Area, production and productivity of principal crops in Kerala both state wise and district wise are given separately for comparative analysis. The rainfall distribution of Kerala with deviation from normal over 2002-2022 period is also provided. Some analytical charts are also included in this collection so that an overall view of the tables can be obtained at a glance.

I express my sincere thanks to all officers associated with the preparation of this document. This edition will be very useful to all the stakeholders in agriculture and allied sectors. I look forward to comments and suggestions for further improvement.

Data on Agricultural Census

1

Chapter 1

Data on Agricultural Census

Agriculture Census, conducted once in every five years, gives an idea of the structure of agriculture economy as such which can be had from a study of the changing pattern of operational holdings. On analysing the Reports of Agricultural Census published by Economics and Statistics Department in 2000-01, 2005-06, 2010-11 and 2015-16, it can be seen that the total number of operational holdings increased from 66.57 lakhs in 2000-01 to 69.04 lakhs in 2005-06 and then decreased in 2010-11 to 68.30 lakhs and again increased to 75.83 lakhs in 2015-16.

The Average size of holdings showed a decreasing trend, from 0.24 hectares in 2000-01 it decreased to 0.23 hectares in 2005-06 and then to 0.22 hectares in 2010-11 and decreased again to 0.18 hectares in 2015-16. The numbers, area and average size of operational holdings on 2000-01, 2005-06 and 2010-11, 2015-16 are given in the following tables.

Table 1.1 (a)

Cropping Intensity & Land Utilization 3

Chapter 3

Cropping Intensity & Land Utilization

This chapter is based on data from "Agricultural Statistics" published annually by DES.

There is a considerable increase in the double or multiple cropped area due to mixed cropping pattern, the availability of irrigation facilities and other measures of intensification of agriculture in Kerala. In order to assess the trends in intensity which is the ratio of total cropped area to the net cropped area, the cropping intensity is calculated.

Table 3.1
CROPPING INTENSITY OF KERALA FROM 2000-01 to 2020-2021

SL. No	Year	Gross cropped area (Ha)	Net area sown (Ha)	Intensity of cropping (%)
1	2000-01	3021682	2206126	136.97
