NOTICE INVITING TENDER

e-Government Procurement (e-GP)

TENDER NO. :AGRI/DOA/TR/70/2023_5_1_1/1

The State Agricultural Engineer Agriculture Department, (AGRI)O/o Office of the State Agricultural Engineer ,Directorate of Agriculturefor and on behalf of the Governor of Kerala invitesonline bids for the work detailed below from the Registered Bidders of Kerala PWD/CentralPWD/Other Central or State Government Departments/State orCentral Public Sector Undertakings etc.who have successfully completed at least onesimilar work costing more than 40% (Forty percentage) of the estimated cost of the workwithin the last five years. A certificate to this effect from the agreement executing authority of the completed similar work shall invariably be submitted along with the tender documentsfailing which the tenders will not be accepted. The certificate should contain the details suchas name of work, agreement number, date of start and completion as per agreement,completed amount of work etc.

1	Name of Work	GENERAL-AE(2)79/2022-Lift irrigation projects for Various padashekharms in Wayanad under RIDF XXVIII-General Civil Work
2	Location of Work	Wayanad
3	Estimated Cost of Work	Rs.59791390/-

4	Brief Description of Work	<p>The Project is for providing irrigation facilities to various padashekharas in Wayanad under RIDF XXVIII Scheme. Construction of irrigation facilities for six padashekharas having total of 306.53 Ha are taken under this project. It is planned to irrigate 70 Ha of land in Panamaram Punchavayal Padasekharam, 54 Ha land in Manikkuni Pandyattuvayal Padashekharas, 50 Ha area in Kolembetta Padasekharam, 47.3 Ha area in Valiyavattam Padasekharam, 39.73 Ha area in Padiyeri Padasekharam, and 45.5 Ha area in Varinilam Padashekharas. The basic farming is paddy in these areas and due to water stress in different areas most of the upper part of the area are converted to other farming like Banana and Arecanut. A total of 445 families holding land in the project area.</p> <p>As part of the project it is planned to provide the following infrastructures at various padashekharas included in the scheme.</p> <p>a. Panamaram Punchavayal Padshekharas It is proposed to donate the existing private pumphouse for the scheme and the farmers shared the copy of agreement paper with the office. There is a total of 70 Ha of land in Panamaram Punchavayal Padasekharam. As per prepared irrigation plan 5148m of pipe line network is needed to provide irrigation water to each and every corner of the padashekharas without having any conveyance loss. A total of 103 nos of spouts with 65mm GI pipe will be provided along the pipe network with an average spacing of 50m along the line. It is designed to irrigate the entire field with two days of time with two shifts per day. About 26 nos of spouts can be opened for irrigation in a shift.</p> <p>b. Manikkuni Pandyattuvayal Padshekharas It is proposed to construct new pump house for the scheme in the available revenue land near to the bank of Kolavayal Puzha from which the water is taken for irrigation. There is a total of 54 Ha of land in Manikkuni Pandyattuvayal Padasekharam. As per prepared irrigation plan 6240m of pipe line network is needed to provide irrigation water to each and every corner of the padashekharas without having any conveyance loss. A total of 125 nos of spouts with 65mm GI pipe will be provided along the pipe network with an average spacing of 50m along the line. It is designed to irrigate the entire field with two days of time with two shifts per day. About 32 nos of spouts can be opened for irrigation in a shift.</p> <p>c. Kolembetta Padshekharas It is proposed to use the existing pump house for the scheme in the available revenue land near to the bank of Kolembetta Kolavayal Puzha from which the water is taken for irrigation. There is a total of 50 Ha of land in Kolembetta Padasekharam. As per prepared irrigation plan 6162m of pipe line network is needed to provide irrigation water to each and every corner of the padashekharas without having any conveyance loss. A total of 124 nos of spouts with 65mm GI pipe will be provided along the pipe network with an average spacing of 50m along the line. It is designed to irrigate the entire field with two days of time with two shifts per day. About 31 nos of spouts can be opened for irrigation in a shift.</p> <p>d. Valiyavattam Padshekharas</p>
---	---------------------------	---

		<p>It is proposed to construct new pump house for the scheme in the available revenue land near to the bank of Valiyavattam Valiya Puzha from which the water is taken for irrigation. There is a total of 47.3 Ha of land in Valiyavattam Padasekharam. As per prepared irrigation plan 4536m of pipe line net work is needed to provide irrigation water to each and every corner of the padasekharam without having any conveyance loss. For pumping approximately 25HP submersible pumpset is required to deliver a designed flow of 44 LPS with a maximum head requirement of 22m. A total of 91 nos of spouts with 65mm GI pipe will be provided along the pipe net work with an average spacing of 50m along the line. It is designed to irrigate the entire field with two days of time with two shifts per day. About 23 nos of spouts can be opened for irrigation in a shift. Also it is proposed to construct a 14m span Vented Cross Bar across Valiyavattam Valiya Puzha to store run off water at a minimum height of 1.2m for installing submersible pumpset. The piers are proposed at a height of 3.5m to ensure free water flow during monsoon without causing flooding. The designed width of pier is 80cm. The foundation depth of pier is 1.3m and apron foundation depth is 0.55m. The total length of bed is 16.5m. The abutments will be provided with a bottom width of 1.4m and top width 0.5m. The wing walls are provided for a length of 2m. 15m of up stream and down stream is also protected with side protection wall with a height of 3m. The entire structure is proposed to construct with RCC 1:2:4 with providing minimum reinforcement of 8Kg/sqm to resist thermal expansion. The structure will benefit for both the irrigation schemes Valiyavattam and Padiyeri. It is also proposed to provide shutters with Vengai wood of 50mm thick for the VCB to ensure sufficient water stagnation in the up stream during summer periode.</p> <p>e. Padiyeri Padshekharam (Thavani Side)</p> <p>It is proposed to construct new pump house for the scheme in the available revenue land near to the bank of Valiyavattam Valiya Puzha from which the water is taken for irrigation. There is a total of 39.73 Ha of land in Padiyeri Padasekharam. The total padasekharam is splitted in to two parts for irrigation purpose. As per prepared irrigation plan 4026m of pipe line network for Thavani side (39.73 Ha) is needed to provide irrigation water to each and every corner of the padasekharam without having any conveyance loss. A total of 81 nos of spouts with 65mm GI pipe will be provided along the pipe network with an average spacing of 50m along the line. It is designed to irrigate the entire field with two days of time with two shifts per day. It is designed to irrigate the entire field with two days of time with two shifts per day. About 17 nos of spouts can be opened for irrigation in a shift.</p> <p>f. Varinilam Padshekharam</p> <p>In Varinilam padshekharam the canal net work is already established through various schemes under this office. But during floods in 2019 the foot hills are slid down to damage about 90m of existing canal. Due to which the water flow through the canal net work is stopped and the existing scheme is not benefiting the farmers for</p>
--	--	---

		irrigation. Therefore for it is proposed to reconstruct the canal portion to make the present infrastructure in the padashekham beneficial for irrigation. Also there exists a check dam and has no shutters for holding water. Therefore it is proposed to provide shutters for the check dam and also to provide 70m canal to convey water from check dam to the nearby paddy field. The total area of 45.5Ha in the padashekham will be brought under irrigation after completing the scheme. It is proposed to construct canals with RCC 1:1.5:3 using 20mm broken stone with an overall thickness of 15cm. The canal has a width of 65cm and height of 45cm. The foundation of canal is provided with PCC 1:4:8 using 40mm broken stone 15cm thickness.
5	Bid Security	Rs.200000/-
6	Bid Submission fee (Tender fee)	11025+(1985)GST
7	Period Of Completion	0 Days 0 Months 3 Years
8	Classification of Bidder	CIVIL-A
9	Last date and time for submission of bids	01-07-2023 at 14:00
10	Bidding procedure	Two Stage
11	Pre Bid meeting Date, time and place	Not Applicable
12	Date and time of opening of Technical Bid	03-07-2023 at 15:00

Bid documents including the Bill of Quantities (BoQ) can be downloaded free of cost from the e-Government Procurement (e-GP) Website www.etenders.kerala.gov.in. All bid documents are to be submitted online only and in the designated cover(s)/ envelope(s) on the e-GP website. Tenders/ bids shall be accepted only through online mode on the e-GP website and no manual submission of the same shall be entertained. Late tenders will not be accepted. A bid submission fee shall be remitted online during the time of bid submission.

The hard copies of certificates and documents, as detailed in clause 4.4 of Part-I Instructions to the Bidders, shall be submitted subsequently after online submission of bids in a separate cover by registered post/speed post before the date and time of opening of technical bid. Price Bid shall only be submitted through online. Details regarding remittance of Bid Submission Fee and Bid Security, Bid preparation and submission are mentioned in the bid document.

The bids shall be opened online on 03-07-2023 at 15:00 at the office of the O/o Office of the State Agricultural Engineer, Directorate of Agriculture in the presence of the Bidders /their authorized representatives who wish to attend at the above address. If the tender opening date happens to be on a holiday or non-working day due to any other valid reason, the tender opening process will be done on the next working day at same time and place.
